

Wall Spot

Cat. No. WS

Cat. No. WS/R

Cat. No. WSGU

The Wall Spot has been designed to be mounted on walls and provide directional light for pathways and structural elements of a building. This luminaire has a fully adjustable head allowing 360 degree rotation and 0-90 degree elevation.

This luminaire is machined from a choice of 10mm solid aluminium with a UV stable powder coated finish, solid copper and 316 stainless steel with a clear, tempered, flush fit glass lens and high temperature silicone gaskets.

The Retro is a 110/240-12 ac mains option suited to an installation where mounting a transformer is a problem, e.g. a brick wall where there is only the cable protruding out of the wall and it is not an option to recess the transformer, or when replacing an existing light fitting. The base increases in size to accommodate the encapsulated IP66 dimmable transformer.

A GU10 version of this luminaire is also available for line voltage lamps. However, a longer body is needed to accommodate the longer lamp.
